Author Index Volume 217 (2008)

- | | | | |
|---|---------|---|---------|
| Abdusalam, H.A. , see Mesloub, S. | 148–156 | Huang, H.-T., Z.-C. Li and Q. Lin , New expansions of numerical eigenvalues by finite elements | 9– 27 |
| Antczak, T. , <i>G</i> -pre-invex functions in mathematical programming | 212–226 | Huang, X. , Mean-semivariance models for fuzzy portfolio selection | 1– 8 |
| Cánovas, M.J., M.A. López and J. Parra , On the equivalence of parametric contexts for linear inequality systems | 448–456 | Huang, X. , see Han, X.-A. | 180–193 |
| Ceng, L.-C. and J.-C. Yao , On the convergence analysis of inexact hybrid extragradient proximal point algorithms for maximal monotone operators | 326–338 | Komori, Y. , Weak first- or second-order implicit Runge–Kutta methods for stochastic differential equations with a scalar Wiener process | 166–179 |
| Chen, R.-B. , see Wang, W. | 110–122 | Larriqueta, M. , see Goberna, M.A. | 420–431 |
| Chen, S.-Y. and S.-Y. Wu , An algorithm for semi-infinite transportation problems | 365–380 | Laurita, C. , see De Bonis, M.C. | 64– 87 |
| Cheng, Z. , see Ma, S. | 194–211 | Lei, Y. , Some results on an <i>n</i> -Ginzburg–Landau-type minimizer | 123–136 |
| De Bonis, M.C. and C. Laurita , Numerical treatment of second kind Fredholm integral equations systems on bounded intervals | 64– 87 | Li, S.J., K.L. Teo and X.Q. Yang , Higher-order Mond–Weir duality for set-valued optimization | 339–349 |
| Ferreira, C., J.L. López and E.P. Sinusia , Asymptotic relations between the Hahn-type polynomials and Meixner–Pollaczek, Jacobi, Meixner and Krawtchouk polynomials | 88–109 | Li, W. , Multiplicative perturbation bounds for spectral and singular value decompositions | 243–251 |
| Geiser, J. , Iterative operator-splitting methods with higher-order time integration methods and applications for parabolic partial differential equations | 227–242 | Li, Z.-C. , see Huang, H.-T. | 9– 27 |
| Goberna, M.A., M. Larriqueta and V.N. Vera de Serio , Stability of the intersection of solution sets of semi-infinite systems | 420–431 | Lin, Q. , see Huang, H.-T. | 9– 27 |
| Guerra Vázquez, F., J.-J. Rückmann, O. Stein and G. Still , Generalized semi-infinite programming: A tutorial | 394–419 | Lin, Z. , An algorithm of evolutionarily stable strategies for the single-population evolutionary game | 157–165 |
| Guo, B.-Y. , see Wang, Z.-Q. | 277–298 | Ling, C. , see Tong, X. | 432–447 |
| Guo, K. , see Huang, G.-X. | 259–267 | López, J.L. , see Ferreira, C. | 88–109 |
| Han, D. , see Zhou, T. | 56– 63 | Lopez, M.A., L. Qi and S.-Y. Wu , | 299–300 |
| Han, X.-A., Y. Ma and X. Huang , A novel generalization of Bézier curve and surface | 180–193 | López, M.A. , see Cánovas, M.J. | 448–456 |
| Hantoute, A. and M.A. López , Characterization of total ill-posedness in linear semi-infinite optimization | 350–364 | López, M.A. , see Hantoute, A. | 350–364 |
| Huang, G.-X., F. Yin and K. Guo , The lower and upper bounds on Perron root of nonnegative irreducible matrices | 259–267 | Ma, S., C. Zhang and Z. Cheng , Delay-dependent robust H_∞ control for uncertain discrete-time singular systems with time-delays | 194–211 |
| | | Ma, Y. , see Han, X.-A. | 180–193 |
| | | Malek, A. and S.H. Momeni-Masuleh , A mixed collocation–finite difference method for 3D microscopic heat transport problems | 137–147 |
| | | Mesloub, S. and H.A. Abdusalam , On a certain class of a nonlinear evolution partial differential equations | 148–156 |
| | | Momeni-Masuleh, S.H. , see Malek, A. | 137–147 |
| | | Noor, M.A. , see Yao, Y. | 46– 55 |
| | | Parra, J. , see Cánovas, M.J. | 448–456 |
| | | Polak, E. and J.O. Royset , Efficient sample sizes in stochastic nonlinear programming | 301–310 |
